

Third Grade

2016-2017 GVC's

GVC stands for Guaranteed Viable Curriculum. The third grade team has worked hard to collaborate with teachers in higher grades with the hope of better preparing students for their future in education. Together we analyzed student data from previous school years. This data helped us to identify what skills the students are missing when they leave third grade. To increase the success of our students, we came up with a list of a few specific goals we want to focus on all year. Our objective is to help each student leave third grade having mastered each of these skills.

Language Arts

- Students will restate the question and use key details in their answer while writing and speaking in complete sentences using Utah Compose at a proficient level.
- Students will cite evidence from the text when writing an essay using the Sage Writing Assessment or Utah Compose at a proficient level.
- Students will use correct capitalization and punctuation in their writing using Utah Compose at a proficient Level.

Math

- Students will demonstrate a mastery of 80% accuracy when reciting multiplication facts 0-9.
 - Students will demonstrate knowledge of place value to 10,000.
-
